

Carpentry, Concrete, TI and Skilled Trades

Are you ready to join a young-but-established construction company, already earning a reputation for doing things differently?

We're looking for dynamic, driven and flexible people who thrive in a fast-paced and ever-changing environment to join our Self-perform team. We want to hear from men and women who love what they do and possess the skills and experience required to deliver great work and customer service on every job.

About us

NGC Constructors Ltd. (NGC) is a mid-size Owner's Representative, General Contractor and Construction Management company with a portfolio of projects across Western Canada valued between \$300,000 and \$15 million. Our vision is "to change the construction industry for the better," and our approach to our business and our culture is one in which we value respect, trust, transparency and the willingness to innovate.

At NGC, we haven't been 'doing the same things for years.' We consider that a strength because it means we're willing to change, adapt and pioneer new approaches to everything we do. Our management team brings solid business experience and perspective to our construction-industry business and our team of experienced and knowledgeable employees and contractors operate all NGC projects with safety, care, commitment and customer-focus.

Who we're looking for

We're looking for journeymen and journeymen with a variety of skills and experience, able to take on a variety of work tasks as part of our Self-perform team.

CONCRETE / ROUGH CARPENTRY

Three to seven years' experience

- Interpret blue prints and drawings and specifications.
- Install shoring, build platforms.
- Structural component framing, steel and wood frame.
- Perform take-off and calculations.
- Any site operational equipment including proper usage and knowledge of power tools.

DRYWALL & STEEL STUD / T-BAR, and typical TI build out experience

Three to five years' experience

- Read and follow blueprints for steel stud layout.
- Mud, tape and install corner beading.
- Measure, fit and cut dry wall for walls and ceiling with precision accuracy.
- Install T-bar systems
- Millwork and finishing / fixturing.

SKILLS PLUS LABOUR

One to five years' experience

- Demo work
- Light metal work
- Layout skills
- Concrete experience

What else we look for in our new hires

No matter what position we're hiring for, we also look for a few other skills. You're a great fit for NGC if you:

- Communicate effectively and work well with others;
- Demonstrate a strong track record and commitment to site safety;
- Are able to use hand tools and power tools;
- Have a flexible schedule and are willing to work weekends, as needed;
- Are willing to travel if required;
- Have excellent attendance, dependability and reliability.

Why work for NGC?

NGC provides a flexible and stimulating work environment with lots of opportunities for personal and professional growth.

NGC's Core Values

- Excellence in reputation and being part of something special
- Integrity, hard work, and continuous improvement
- Be willing to pioneer, set a new path and do the impossible
- Service to our customers above all else
- Encourage individuality, ability and creativity

NGC's Rule of Engagement

- Commit to what you say
- Honour your obligations
- See the job through to the end
- Treat people honourably and with respect
- Respect the Vision, Purpose and Values of NGC
